

Date 1 June 2021 Ms Christine BERG
 Ref.: NMD/D-4724 Head of Unit Single European Sky
 Subject: RP3 Reference Values DG Mobility and Transport
 Contact: Razvan Bucuroiu European Commission
 Direct Line: +32 2 729 36 48 By email: christine.berg@ec.europa.eu
 Encl.: 2

Dear Ms Berg,

In view of the adoption of the revised European Union- wide performance targets for RP3 I am pleased to communicate the local breakdown (reference) values for the key performance areas of capacity and environment. These reference values are required for the assessment by the Commission of the consistency of the local capacity and environment performance targets with the corresponding Union-wide performance targets.

The attached breakdown values (Appendix 1) for the key performance area of capacity are to be understood as the **en route ATFM delay reference values** within the meaning of point 1.3 of Annex IV of Implementing Regulation (EU) 2019/317. The calculation of those breakdown values is based on the following approach:

- The methodology used was approved by the Network Management Board and is included in the European Network Operations Plan 2013-2015 – Edition June 2013 – Capacity Assessment and Planning Guidance;
- The traffic forecast used is the Scenario 2 of the EUROCONTROL STATFOR forecast published in November 2020;
- The reference values are based on the latest agreed capacity performance measurements for Summer 2019;
- The reference values are defined per ACC/ANSP and FAB; when there is only one ACC per ANSP, only the ACC value is provided;
- Those values will be also published in the Network Operations Plan for the period 2022-2024 that will be finalised in October 2021.

The attached breakdown values (Appendix 2) for the key performance area of environment are to be understood as the **en route horizontal flight efficiency reference values** within the meaning of point 1.2 of Annex IV of Implementing Regulation (EU) 2019/317. The calculation of those breakdown values is based on the following approach:

SUPPORTING EUROPEAN AVIATION

Member States: Albania, Armenia, Austria, Belgium, Bosnia and Herzegovina, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Georgia, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Moldova, Monaco, Montenegro, Netherlands, North Macedonia, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey, Ukraine, United Kingdom.
Comprehensive Agreement States: Israel, Morocco.

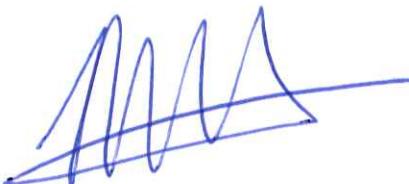

NETWORK
MANAGER

- The methodology used is the EUROCONTROL PRU methodology available on <https://ansperformance.eu/methodology/horizontal-flight-efficiency-pi>
- Latest achieved performance and implementation of major airspace changes, notably Free Route Airspace and cross-border Free Route Airspace;
- Those values will be also published in the European Route Network Improvement Plan (ERNIP) Part 2 – ARN Version 2021-2030 that will be finalised in June 2021.

Yours sincerely,

A handwritten signature in blue ink, appearing to be the name "Iacopo Prissinotti". The signature is fluid and cursive, with some loops and variations in line thickness.

Iacopo Prissinotti
Director Network Management
