

Brussels, 20 June 2018

To the Members of the Single European Sky Committee and Stakeholders

Publication of the *Report* on the EU-wide target ranges for Reference Period 3 and launch of public consultation

Dear Single European Sky Member States and Stakeholders,

The Performance Review Body (PRB) is pleased to share with you the report on EU-wide target ranges for Reference Period 3 (RP3). In the first part, the report provides an overview of the PRB's approach to target setting, while the second part contains the evidence for each Key Performance Area.

You will find the report and its annexes via the PRB section of the SES webpage in the following way:

- Log in to <https://webgate.ec.europa.eu/eusinglesky/> with your EU account.
- Click on "News" to access the Target Ranges Report Part 1 and Part 2, the Annexes and the Template for Comments, by clicking the respective links.
- Alternatively, you will find these documents in the PRB Public Library of the website (top of the page).

Today the PRB is launching a public consultation on the proposed EU-wide target ranges. Stakeholders are invited to provide comments with the above mentioned template no later than **04 September 2018** to the PRB inbox: prb-office@prb.eusinglesky.eu. The PRB welcomes early submission in order to have more time for considering the comments. The PRB will not make the public individual stakeholder's comments, and will publish an overview of the comments.

In addition, the PRB organises a stakeholder consultation workshop on 04 July 2018 in Brussels. During the workshop, the PRB will present the target ranges, as well as the approach and methodology it has used. The workshop provides an opportunity for all stakeholders to express their views and concerns. Registration to the workshop is open until 28 June 2018 via this [online form](#).

We look forward to receiving your comments and your participation at the workshop.

Sincerely yours,

Regula Dettling-Ott
